

Wyoming UCC Certified Search Logic

Certified search results are produced by the application of standardized search logic. Human judgment does not play a role in determining the results of the search. The following logic apply to certified searches:

- (a) There is no limit to the number of matches that may be returned in response to the search criteria.
- (b) No distinction is made between upper and lower case letters.
- (c) Punctuation marks and accents are disregarded.
- (d) Words and abbreviations at the end of a name that indicate the existence or nature of an organization as set forth in the attached ending noise words list are disregarded.
- (e) The word “the” at the beginning of the search criteria is disregarded.
- (f) All spaces are disregarded.
- (g) For first and middle names of individuals, initials are treated as the logical equivalent of all names that begin with such initials.
 - (i) Example: a search request for John A. Smith would cause the search to retrieve all filings against all individual debtor names with “John” as the first name, “Smith” as the last name, and the initial “A” or any name beginning with “A” in the middle name field.
 - (ii) Example: a search request for J. A. Smith would cause the search to retrieve all filings against all individual debtor names with the initial “J” as the first name or any first name beginning with “J;” “Smith” as the last name; and the initial “A” or any name beginning with “A” in the middle name field.
- (h) First name and no middle name or initial is equated with all middle names and initials.
 - (i) Example: a search request for “John Smith” (first and last names with no designation in the middle name field) would cause the search to retrieve all filings against individual debtor names with “John” as the first name; “Smith” as the last name and with any name or initial or no name or initial in the middle name field.
 - (i) One word names: A one word name is entered as a last name (e.g. “Cher” is treated as a last name.)

Ending Noise Word List

Noise words are those words at the end of organization names which indicate a business type.
